

HIGHWAY IMPROVEMENT PROJECT

FEEDBACK FORM

West Vancouver Pre- Design Consultation

OPTION A - Two northbound lanes upslope

Two northbound lanes use a new route constructed upslope. Two southbound lanes use the existing Highway 99 route.

Five horizontal lines for feedback input.

OPTION B - Four upslope lanes

Four new lanes upslope from the existing Highway 99 corridor. The existing Highway 99 serves local traffic.

Five horizontal lines for feedback input.

OPTION C - Northbound tunnel

A two-lane northbound tunnel. Southbound traffic uses existing Highway 99 route.

Five horizontal lines for feedback input.

OPTION D - Two-way, two-lane tunnel

Two-way, two-lane tunnel. One lane northbound and one lane southbound. The existing Highway 99 serves local traffic.

Five horizontal lines for feedback input.
